UX notes

1. The differentiator: a real-time cross-module view SangamCRM never built. Every tile drills into its module.
2. Attention feed correlates cash vs payroll and flags compliance deadlines.

Dear Divya,

Thank you for your enquiry on Reliance Digital's behalf. I'd love to show how Orbit streamlines your operations. Would a quick 15-minute call this week work?

Warm regards,
Sales Team

Review before sending — Orbit never auto-sends.

Regenerate | Copy

UX notes

1 AI-drafted, human-in-the-loop. The 'never auto-sends' law is why it lands where 95% of GenAI pilots fail.

Prototype summary

7 modules + cockpit

CRM · HR · Payroll · Inventory · GST Finance · AI · Integrations, unified on one tenant-scoped data model.

AI-native

Lead scoring, follow-up drafting, call summaries, and a natural-language cockpit copilot — live on Groq, human-in-the-loop.

India-compliant

PF/ESI/PT/TDS payroll, 2025 Labour Codes, GST e-invoicing (IRN), e-Way, GSTR-1 draft — native, not bolted on.

Beats the incumbent

Fills every gap in the SangamCRM audit: HR, Payroll, Inventory, native Finance, and a true CEO cockpit.
